Product Description

Product Description:

The Glass Curtain Wall is an excellent choice for those who want to add a touch of elegance and modernity to their building's exterior. The system is made up of glass panels that are connected to the building's frame. The glass panels can be customized to fit any building's design, making it a versatile option for architects and contractors.

One of the key advantages of the Glass Curtain Wall is its thermal insulation properties. The glass panels are designed to provide excellent insulation, helping to keep the interior of the building warm in the winter and cool in the summer. This can result in significant energy savings, as the building's heating and cooling systems will not have to work as hard to maintain a comfortable temperature. In addition to its thermal insulation properties, the Glass Curtain Wall is also waterproof and soundproof. This makes it an ideal choice for buildings located in noisy or wet environments. The system is designed to keep out water and prevent sound from penetrating the building's interior, providing a peaceful and quiet environment for those inside.

The Glass Curtain Wall is also an energy-saving option. The insulation properties of the glass panels help to reduce the amount of energy needed to heat and cool the building. This can result in lower energy bills and a more sustainable building design.

The Glass Curtain Wall also offers customization options for pattern selection. The system can be designed to include a variety of patterns and designs, allowing building owners to create a unique and personalized look for their buildings.

In conclusion, the Glass Curtain Wall is a versatile and modern building facade system that offers several advantages, including thermal insulation, waterproofing, soundproofing, energy savings, and customization options. It is an excellent choice for those who want to add a touch of elegance and sophistication to their building's exterior.

Features:

Product Name: Glass Curtain Wall

Aluminium Color: Any Color

Aesthetics: Sleek And Modern

Function: Soundproof ,Adjust The Light

Panel Thickness: 1.4~5.0mm

Patterns Selection: Customized Design Available

Applications:

With a minimum order quantity of 100m² and a price of 580RMB, this Glass Curtain Wall is an affordable and high-quality option for those looking to add a touch of sophistication to their building project. The product is also delivered in a wooden box, ensuring that it arrives in perfect condition.

One of the key features of the GuangdongSuperHuge MQ Glass Curtain Wall is its thermal insulation properties. This means that it can help to regulate the temperature inside your building, keeping it warm in winter and cool in summer. This is an important consideration for those who want to reduce their energy bills.

In addition to its thermal insulation properties, the GuangdongSuperHuge MQ Glass Curtain Wall is also soundproof, making it an excellent choice for buildings that are located in noisy environments. It also has the ability to adjust the light, allowing you to create the perfect ambiance for your building project.

Customized patterns are available, allowing you to create a unique design that perfectly matches your vision. The product also has heat insulation properties, making it an excellent choice for buildings that are located in areas with extreme temperatures.

The GuangdongSuperHuge MQ Glass Curtain Wall is an excellent choice for a wide range of applications and scenarios. Whether you are working on a commercial building, a residential property, or an industrial project, this product is sure to meet your needs.
