Product Description

Product Description:

The Glass Curtain Wall offers several advantages that make it an attractive option. Firstly, it is waterproof, which means it can protect the building from any water damage. Secondly, it is soundproof, which means it can keep out any noise from outside the building. Lastly, it is energy-saving, which means it can help reduce energy costs for the building.

The Glass Curtain Wall is also designed to provide thermal insulation, which is essential for any building. It can protect the building from extreme temperatures, which can lead to high energy costs and uncomfortable living conditions. The Glass Curtain Wall is an excellent choice for any building that needs to maintain a comfortable temperature throughout the year.

The Glass Curtain Wall is made from high-quality glass panels that are 1.4~5.0mm in thickness. This thickness ensures that the Glass Curtain Wall is long-lasting and can withstand the elements. It is a durable product that will last for many years, making it an excellent investment for any building.

The Glass Curtain Wall is also designed to be sleek and modern, which makes it an attractive option for any building. The Glass Curtain Wall can be customized to suit any building's design, which means it can be tailored to fit any building's aesthetics. The Glass Curtain Wall is an excellent choice for any building that wants to make a statement.

In conclusion, the Glass Curtain Wall is an excellent architectural product that offers several benefits to any building. It is waterproof, soundproof, and energy-saving, making it an attractive option for any building. The Glass Curtain Wall also provides thermal insulation, which is essential for any building. The Glass Curtain Wall is made from high-quality glass panels that are 1.4~5.0mm in thickness, making it a durable product that will last for many years. The Glass Curtain Wall is also designed to be sleek and modern, which makes it an attractive option for any building. The Glass Curtain Wall is an excellent investment for any building that wants to protect against thermal insulation while also maintaining a modern aesthetic.

Applications:

GuangdongSuperHuge's Glass Curtain Wall product model MQ, originating from China, is a perfect solution for modern architectural designs. With CE and ISO certification, this product assures quality and durability.

This Glass Curtain Wall product is suitable for a variety of occasions and scenarios. It is perfect for large commercial buildings, such as shopping malls, airports, and hotels. The Glass Curtain Wall provides a sleek and modern look to these buildings, creating a striking first impression to visitors. It is also ideal for office buildings, where natural light is important. The Glass Curtain Wall allows for maximum natural light to enter the building, thus reducing the need for artificial lighting.

This product is also perfect for residential buildings. The Glass Curtain Wall provides a stunning and seamless view of the surroundings. It is perfect for those who want to enjoy the beauty of nature from the comfort of their own home. Additionally, the Glass Curtain Wall provides soundproofing properties, which is ideal for those who live in busy areas or near highways.

GuangdongSuperHuge's Glass Curtain Wall product is available in various thicknesses ranging from 1.4mm to 5.0mm. The product can be customized to match any color, making it perfect for any architectural design. The patterns can also be customized to meet the specific design needs of the building.

The Glass Curtain Wall product is not only aesthetically pleasing but also functional. It has the ability to adjust the light entering the building, making it energy-efficient and cost-effective. The product is long-lasting and requires minimal maintenance, making it a wise investment for any building owner.

The minimum order quantity for this product is 100m², and the price is 580RMB per square meter. The product is packaged in wooden boxes for added protection during transportation. The delivery time is between 20 to 60 working days, and payment terms are T/T.
