- Brand Name: GuangdongSuperHuge
- Certification: CE,ISO
- Model Number: Windows
- Minimum Order Quantity: 100m<sup>2</sup>
- Price: 288-1688RMB/m<sup>2</sup>
- Packaging Details: Wooden Box/Completely sealed wooden box
- Delivery Time: 20-60work days
- Payment Terms: T/T

#### Product Specification

- Features: Cost-effective
- Glass: Customisation
- Surface Treatment: Powder Spraying/Fluorocarbon Spray
- Venue: Home
- Color: Color Customization
- Material: Aluminum Alloy
- Size: Customisation
- Soundproof: Y/N
- Insulation: Y/N
- The Broken Bridge: Y/N
- Hardware Accessories: Customisation
- Viscose: Glass Glue
- Security Compartment: Y/N

## Product Description

### Product Description:

Aluminium Sliding Windows are cost-effective and provide an excellent return on investment. They are durable and can withstand harsh weather conditions, making them ideal for any home. The material used in making these windows is aluminum, which is a strong and lightweight metal. This makes them easy to install and maintain, and they can last for many years.

One of the advantages of Aluminium Sliding Windows is that they are customizable. This means you can choose the type of glass that suits your needs, such as tempered, laminated, or insulated glass. You can also choose the thickness of the glass, depending on your preference. Customization of the glass used in the windows can help you control the amount of light that enters your home, and it can also reduce noise pollution.

The surface treatment of Aluminium Sliding Windows is either Powder Spraying or Fluorocarbon Spray. Powder Spraying is a technique that involves applying a dry powder to the surface of the windows. The powder is then heated, and it melts to form a protective coating on the aluminum surface. The coating is durable and can withstand harsh weather conditions. Fluorocarbon Spray, on the other hand, is a liquid spray that is applied to the surface of the windows. The liquid is then heated, and it forms a protective layer on the aluminum surface. The coating is durable and can withstand harsh weather conditions, and it is also resistant to UV rays and corrosion.

Aluminium Sliding Windows are a great investment for any homeowner. They offer a modern look, are durable, and can be customized to suit your needs. The material used in making these windows is aluminum, which is strong and lightweight. The windows can last for many years, and they are easy to install and maintain. The surface treatment used in making these windows is either Powder Spraying or Fluorocarbon Spray, which makes them resistant to harsh weather conditions.
