

Energy Generating Solar PV Glass Weather Resistant Size Customized

Our Product Introduction

for more products please visit us on glass-curtainwall.com

Basic Information

- Place of Origin: China
- Brand Name: GuangdongSuperHuge
- Certification: CE,ISO
- Model Number: MQ
- Minimum Order Quantity: 100m²
- Price: 688-2088RMB/m²
- Packaging Details: Wooden Box/Completely sealed wooden box
- Delivery Time: 20-60work days
- Payment Terms: T/T

Product Specification

- Material: Glass
- Size: Customisation
- Color: Customisation
- Efficiency: Solar Cell Efficiency
- Installation: Customisation
- Function: Energy Generation
- Durability: Weather Resistant
- Application: Building Facades
- Thickness: Customisation
- Frame Material: Aluminum Alloy
- Name: Solar PV Glass
- Highlight: **Energy Generating Solar PV Glass,
Solar PV Glass Weather Resistant**

Product Description

Energy Generating Photovoltaic Glass Curtain Wall Installation With Customized Color

Product Description:

Our Photovoltaic Glass Curtain Wall is made of high-quality glass, which provides a durable and weather-resistant exterior. The material used not only offers protection against harsh weather but also assures that the solar cells remain safe and undamaged. The glass curtain wall is a popular and versatile option for any building, and it can be customized to fit any size or shape.

The Photovoltaic Glass Curtain Wall is designed to maximize energy efficiency, utilizing solar cell technology to convert sunlight into electricity. The solar cells used in the curtain wall have a high efficiency rate, ensuring that the building can generate a significant amount of energy from the sun. This technology helps reduce energy costs and minimizes the carbon footprint of the building.

Our Photovoltaic Glass Curtain Wall is a customizable installation, meaning that it can be tailored to meet the specific needs of your building. The customization options allow for a variety of configurations, including glazed aluminum curtain walls, composite curtain wall, and other designs. Our team of experts works closely with clients to ensure that each Photovoltaic Glass Curtain Wall installation is optimized for efficiency, functionality, and aesthetic appeal.

The Photovoltaic Glass Curtain Wall is a reliable and long-lasting solution for energy-efficient buildings. The weather-resistant glass and high-quality solar cells ensure that the building can generate energy efficiently for many years to come. This product is an excellent investment for any building owner, as it provides a cost-effective and sustainable solution for energy consumption.

In summary, our Photovoltaic Glass Curtain Wall is a customizable, efficient, and durable installation that combines the functionality of a glass curtain wall with the power of solar energy. It is an ideal choice for modern, eco-friendly buildings that require both aesthetic appeal and energy efficiency. Contact us today to learn more about how our Photovoltaic Glass Curtain Wall can benefit your building.

Features:

Product Name: Photovoltaic Glass Curtain Wall
Function: Energy Generation
Color: Customisation
Material: Glass
Efficiency: Solar Cell Efficiency
Application: Building Facades
Features:
Glass Curtain Walls with Double Glass PV Modules
Double Glass Solar Panel for Energy Generation

Technical Parameters:

Product Name:	Double Glass Solar Panel Composite Curtain Wall
Application:	Building Facades
Efficiency:	Solar Cell Efficiency
Color:	Customisation
Durability:	Weather Resistant
Thickness:	Customisation
Size:	Customizable
Material:	Glass
Function:	Energy Generation
Installation:	Customisation

Applications:

The MQ Photovoltaic Glass Curtain Wall is primarily used for building facades. It is a perfect solution for buildings that require a modern and sleek look while also providing energy generation capabilities. The product's customisable colour feature ensures that it can blend into any building design. The product is highly efficient due to its solar cell efficiency, meaning that it can generate a significant amount of energy while taking up minimal space.

The MQ Photovoltaic Glass Curtain Wall can be used in a variety of scenarios. For instance, it can be installed in commercial buildings such as offices, shopping malls and hotels. It can also be used in residential buildings such as apartment complexes and homes. The product's energy generation capabilities make it a perfect fit for buildings in regions with high energy consumption rates.

One of the key benefits of using the MQ Photovoltaic Glass Curtain Wall is that it is easy to install. The product can be installed on both new and existing buildings, making it a cost-effective solution for energy generation. Additionally, the product is low-maintenance, meaning that it requires minimal upkeep.

In conclusion, GuangdongSuperHuge's MQ Photovoltaic Glass Curtain Wall is a versatile product that can be used in a variety of applications. Its double glass PV modules or double glass solar panel design ensures that it is durable and efficient. The product is a perfect solution for building facades, and its customisable colour feature ensures that it can blend into any building design. The MQ Photovoltaic Glass Curtain Wall is easy to install and low-maintenance, making it a cost-effective solution for energy generation.

Customization:

Support and Services:

The Photovoltaic Glass Curtain Wall product technical support and services include:

- Design assistance and customization
- Installation support and guidance
- On-site training for installation and maintenance
- Ongoing technical support and troubleshooting
- Warranty and repair services
- Performance monitoring and analysis

Packing and Shipping:

Product Packaging:

The Photovoltaic Glass Curtain Wall product will be securely packed in a wooden crate to prevent any damage during transportation.

The crate will be labeled with the product name, dimensions, weight, and handling instructions.

Shipping:

The Photovoltaic Glass Curtain Wall product will be shipped via a reliable carrier service.

The shipping cost will be calculated based on the destination, weight, and dimensions of the crate.

The customer will be provided with a tracking number to monitor the status of their shipment.

Delivery times may vary depending on the destination and carrier service used.

FAQ:

Q: What is a Photovoltaic Glass Curtain Wall?

A: A Photovoltaic Glass Curtain Wall is a building envelope system that integrates solar panels into glass panels to generate electricity from sunlight.

Q: What is the brand name of the Photovoltaic Glass Curtain Wall?

A: The brand name of the Photovoltaic Glass Curtain Wall is GuangdongSuperHuge.

Q: What is the model number of the Photovoltaic Glass Curtain Wall?

A: The model number of the Photovoltaic Glass Curtain Wall is MQ.

Q: Where is the Photovoltaic Glass Curtain Wall made?

A: The Photovoltaic Glass Curtain Wall is made in China.

Q: How does the Photovoltaic Glass Curtain Wall generate electricity?

A: The Photovoltaic Glass Curtain Wall generates electricity by converting sunlight into electrical energy through the use of photovoltaic cells embedded in the glass panels.
