

Custom Glass Photovoltaic Curtain Walls Energy Generating Panels with Custom Colors for Building Facades

Our Product Introduction

for more products please visit us on glass-curtainwall.com

Basic Information

- Place of Origin: China
- Brand Name: GuangdongSuperHuge
- Certification: CE,ISO
- Model Number: MQ
- Minimum Order Quantity: 100m²
- Price: 688-2088RMB/m²
- Packaging Details: Wooden Box/Completely sealed wooden box
- Delivery Time: 20-60work days
- Payment Terms: T/T

Product Specification

- Durability: Weather Resistant
- Size: Customizable
- Color: Customisation
- Function: Energy Generation
- Efficiency: Solar Cell Efficiency
- Installation: Customisation
- Application: Building Facades
- Material: Glass
- Thickness: Customisation
- Size: Customisation
- Frame Material: Aluminum Alloy
- Name: Solar PV Glass

Product Description

Product Description:

The Photovoltaic Glass Curtain Wall is made up of double glass PV modules or double glass solar panels that have been integrated into a composite curtain wall. This integration allows for the panels to seamlessly blend into the building's exterior, creating a beautiful and modern look.

One of the key attributes of our Photovoltaic Glass Curtain Wall is its weather resistance. The panels are designed to withstand harsh weather conditions without any damage, ensuring that the building remains protected and secure.

Our product is also highly durable, thanks to the use of high-quality materials and advanced manufacturing techniques. This means that the Photovoltaic Glass Curtain Wall will last for years to come, making it a worthwhile investment for any building project.

Another advantage of the Photovoltaic Glass Curtain Wall is its customisation options. Whether you need a specific size or installation method, we can tailor the product to meet your unique requirements. This ensures that the final result is exactly what you envisioned for your building's exterior.

In conclusion, our Photovoltaic Glass Curtain Wall is a high-quality product that offers numerous benefits for building facades. Its double glass PV modules or double glass solar panels, composite curtain wall design, weather resistance, and customisation options make it a top choice for architects, builders, and property owners alike.

Features:

Product Name: Photovoltaic Glass Curtain Wall

Function: Energy Generation

Efficiency: Solar Cell Efficiency

Application: Building Facades

Thickness: Customisation

Installation: Customisation

Features:

Double Glass PV Modules

High Solar Cell Efficiency

Customisable Thickness

Customisable Installation

Suitable for Glass Curtain Walls

Technical Parameters:

Attribute	Description
Product Name	Glass Curtain Walls/Double Glass Solar Panel/Glass Curtain Walls
Color	Customisation
Thickness	Customisation
Efficiency	Solar Cell Efficiency
Size	Customizable
Installation	Customisation
Application	Building Facades
Durability	Weather Resistant
Material	Glass
Function	Energy Generation

Applications:

The MQ Photovoltaic Glass Curtain Wall is a combination of double glass solar panels and composite curtain wall technology. The double glass solar panel is made up of two layers of tempered glass, with a photovoltaic module sandwiched in between. This design provides superior durability and high solar cell efficiency, which makes it an ideal choice for energy generation.

The Composite Curtain Wall is made up of two layers of glass held together by a high-strength adhesive. The MQ Photovoltaic Glass Curtain Wall is customisable, which means it can fit seamlessly into any building design. The product comes in a range of colours, making it suitable for any building aesthetic.

The MQ Photovoltaic Glass Curtain Wall is specifically designed for use in commercial and industrial buildings. It is perfect for applications such as office buildings, shopping centres, airports, and hospitals. Its energy generation function helps to reduce the carbon footprint of these buildings, making them sustainable and environmentally-friendly.

This product is also ideal for building owners who are looking to save on energy costs. The double glass PV modules generate electricity, which can be used to power the building's lighting and other electrical appliances. This significantly reduces the need for external power sources, leading to cost savings in the long run.

The installation of the MQ Photovoltaic Glass Curtain Wall is customised to fit the specific building design. This means that it can be easily

installed in both new and existing buildings without major structural modifications.

In conclusion, the MQ Photovoltaic Glass Curtain Wall is an innovative product that combines double glass solar panel and composite curtain wall technology. It is customisable and comes in a range of colours, making it perfect for any building design. Its energy generation function makes it ideal for commercial and industrial buildings, helping to reduce carbon footprint and save on energy costs.

Customization:

Customize your Photovoltaic Glass Curtain Wall with our product customization services from GuangdongSuperHuge, model number MQ, made in China. Our installation options are fully customizable to fit your specific needs. Our product boasts high solar cell efficiency and weather-resistant durability, making it the perfect choice for building facades. Our Composite Curtain Wall is made with double glass PV modules, ensuring maximum energy generation. Choose our Double Glass Solar Panel option for even greater efficiency.

Support and Services:

Our Photovoltaic Glass Curtain Wall product is backed by a team of technical support and services experts who are available to help you with any inquiries or issues you may have. Our support services include:

Design and engineering consultation

Product specifications and testing information

Installation guidance and training

Maintenance and repair assistance

Warranty and claims support

We are committed to providing exceptional customer service and ensuring the success of your project. Please do not hesitate to reach out to our technical support team for any assistance.

Packing and Shipping:

Our Photovoltaic Glass Curtain Wall product is carefully packaged to ensure safe delivery to your location. The product is first wrapped in protective material to prevent scratches and damage during transport. It is then packed in a sturdy cardboard box with additional cushioning to absorb any shocks during shipping.

Once your order is confirmed, we will process it within 2 business days and ship it out to you via our trusted shipping partners. You will receive a tracking number so you can easily track the status of your delivery.

Please note that due to the size and weight of the product, additional shipping fees may apply. We will inform you of any additional fees before processing your order.

FAQ:

GuangdongSuperHuge

. 2. Q: What is the model number of the Photovoltaic Glass Curtain Wall? A: The model number of this product is MQ

. 3. Q: Where is the Photovoltaic Glass Curtain Wall manufactured? A: This product is manufactured in China

. 4. Q: What is the size of the Photovoltaic Glass Curtain Wall? A: The size of this product can be customized according to the requirements of the project. 5. Q: What is the warranty period for the Photovoltaic Glass Curtain Wall? A: Please refer to the warranty information provided by the manufacturer for details on the warranty period.
