

## Modern Steel Construction Building Earthquake Resistant Industrial Steel Structure

### Our Product Introduction

for more products please visit us on [glass-curtainwall.com](http://glass-curtainwall.com)

#### Basic Information

- Place of Origin: China
- Brand Name: GuangdongSuperHuge
- Certification: CE,ISO
- Model Number: GJG
- Minimum Order Quantity: 100m<sup>2</sup>
- Price: 388-1088RMB/m<sup>2</sup>
- Packaging Details: Wooden Box/Completely sealed wooden box
- Delivery Time: 20-60work days
- Payment Terms: T/T

#### Product Specification

- Material: Steel
- Versatility: High
- Feature: Earthquake-Resistance
- Durability: High
- Corrosion Resistance: High
- Aesthetics: Modern
- Main Steel: Q355-Q460/Special
- Name: Modern Steel Construction
- Highlight: **Modern Steel Construction Building,  
Building Industrial Steel Structure,  
Building Steel Construction Earthquake  
Resistant**

Product Description

Earthquake Resistant Steel Construction With Modern Aesthetics And Superior Corrosion Resistance

Product Description:

One of the key features of our Industrial Steel Structure is its earthquake-resistant design, which has been engineered to withstand even the most severe seismic events. This makes it an ideal choice for businesses and organizations that operate in areas with a high risk of earthquakes.

In addition to its superior strength and durability, our Industrial Steel Structure is also highly versatile and can be customized to meet the unique needs and requirements of any project. Whether you need a small structure for a local business or a large-scale facility for a multinational corporation, our team of experts can design and build a structure that meets your specific needs.

Another major advantage of our Industrial Steel Structure is its high level of corrosion resistance. Unlike other building materials that can be damaged by exposure to moisture, steel is highly resistant to rust and other forms of corrosion. This means that your structure will maintain its integrity and appearance for many years, even in harsh environments.

When it comes to aesthetics, our Industrial Steel Structure is a top choice for modern businesses and organizations. Its sleek and contemporary design can be customized to match the look and feel of your brand, making it an ideal choice for retail stores, office buildings, and other commercial properties.

Overall, our Industrial Steel Structure is a top-of-the-line choice for any business or organization that needs a heavy-duty, earthquake-resistant structure that can withstand the test of time. If you're looking for a durable and reliable building solution that can be customized to meet your specific needs, look no further than our Industrial Steel Structure.

Features:

- Product Name: Steel Construction
- Corrosion Resistance: High
- Main Steel: Q355-Q460/Special
- Aesthetics: Modern
- Versatility: High
- Durability: High
- Industrial Steel Construction
- Heavy Steel Fabrication
- Industrial Steel Structure

Technical Parameters:

Feature	Earthquake-Resistance
Corrosion Resistance	High
Durability	High
Aesthetics	Modern
Versatility	High
Material	Steel
Main Steel	Q355-Q460/Special

This Steel Construction product is suitable for Industrial Steel Structure, Custom Steel Fabrication, and Heavy Steel Fabrication.

Applications:

One main application occasion for the GJG product is in custom steel fabrication for large-scale construction projects such as high-rise buildings, bridges, and industrial plants. The product's main steel composition of Q355-Q460/Special ensures that the final product is of high quality and long-lasting.

Another scenario where the GJG product is highly beneficial is in the construction of earthquake-resistant structures. The product's feature of being earthquake-resistant makes it an excellent choice for areas prone to seismic activity.

The versatility of the GJG product allows it to be used in a variety of other product application occasions. For example, it can be used in the construction of stadiums, airport terminals, and train stations. Its modern aesthetic also makes it an excellent choice for architects and designers looking to create visually stunning buildings.

Overall, GuangdongSuperHuge's GJG steel construction product is a durable, versatile, and modern solution for heavy steel fabrication needs. Its high-quality main steel composition and earthquake-resistant feature make it an excellent choice for custom steel fabrication and other construction projects.

Customization:

Support and Services:

Our Steel Construction product technical support team is available to assist with any questions or issues you may have regarding the product's installation, operation, or maintenance. We also offer a range of services including:

On-site technical support and troubleshooting

Customized design and engineering services

Training and educational resources for product use and maintenance

Regular product updates and maintenance recommendations

We are committed to providing the highest level of support and service to ensure the success of your Steel Construction project. Contact us today to learn more.

## Packing and Shipping:

### Product Packaging:

The Steel Construction product is carefully packaged in a sturdy cardboard box to ensure safe delivery. The product is wrapped in protective foam to prevent any scratches or damage during transit. All necessary hardware and instructions are included inside the package.

### Shipping:

We offer free standard shipping for all orders of Steel Construction product within the United States. The estimated delivery time is 5-7 business days. Expedited shipping options are also available at an additional cost. We ship internationally, but shipping rates and delivery times may vary depending on the destination country. Please contact us for more information.

## FAQ:

Q: What is the brand name of the steel construction product?

A: The brand name of the steel construction product is GuangdongSuperHuge.

Q: What is the model number of the steel construction product?

A: The model number of the steel construction product is GJG.

Q: Where is the steel construction product manufactured?

A: The steel construction product is manufactured in China.

Q: What are the dimensions of the steel construction product?

A: The dimensions of the steel construction product vary depending on the specific model. Please refer to the product specifications for more information.

Q: What is the weight capacity of the steel construction product?

A: The weight capacity of the steel construction product varies depending on the specific model. Please refer to the product specifications for more information.
