Basic Information

- Place of Origin: China
- Brand Name: GuangdongSuperHuge
- Certification: CE,ISO
- Model Number: MQ
- Minimum Order Quantity: 100m²
- Price: 580RMB
- Packaging Details: Wooden Box
- Delivery Time: 20-60work days
- Payment Terms: T/T

Product Specification

- Function: Soundproof ,Adjust The Light
- Heat Insulation: Yes
- Aesthetics: Sleek And Modern
- Panel Thickness: 1.4~3.0mm
- Protection: Thermal Insulation
- Patterns Selection: Customized Design Available
- Aluminium Color: Customizable Color
- Advantage: Waterproof, Soundproof, Energy Saving
- Highlight: **1.4-3.0mm glass curtain wall,
sustainable office building curtain wall,
contemporary glass wall panel**

Product Description:

The Glass Curtain Wall is a cutting-edge architectural product that combines functionality and aesthetics seamlessly. It is specifically designed to enhance the overall look and performance of buildings, making it a popular choice for modern constructions.

One of the key features of the Glass Curtain Wall is its exceptional heat insulation properties. With heat insulation capabilities, this product helps in maintaining a comfortable indoor temperature, reducing the need for excessive heating or cooling systems. This not only contributes to energy efficiency but also creates a more sustainable building environment.

Additionally, the Glass Curtain Wall offers thermal insulation, providing protection against temperature variations and external weather conditions. This thermal insulation ensures that the building's interior remains comfortable and consistent, enhancing the overall living or working experience for occupants.

Another important function of the Glass Curtain Wall is its soundproofing capabilities. By effectively blocking out external noise pollution, this product helps create a peaceful and quiet indoor environment. This is particularly beneficial for buildings located in busy urban areas or near high-traffic zones.

Moreover, the Glass Curtain Wall is designed to adjust the light entering the building, allowing for natural light optimization. This feature not only enhances the visual appeal of the interior space but also contributes to energy savings by reducing the reliance on artificial lighting during the day.

The Glass Curtain Wall is constructed using panels with a thickness range of 1.4 to 3.0mm, ensuring durability and structural integrity. This panel thickness provides the necessary strength and stability required for the product to withstand various external forces and environmental conditions.

From an aesthetic standpoint, the Glass Curtain Wall offers a sleek and modern design that adds a touch of sophistication to any building facade. Its clean lines and contemporary appearance make it a versatile choice for both residential and commercial structures, complementing various architectural styles.

In conclusion, the Glass Curtain Wall is a versatile architectural product that excels in heat insulation, thermal protection, soundproofing, light adjustment, panel thickness, and aesthetics. Its innovative design and functional features make it an ideal choice for modern buildings seeking to achieve both performance and visual appeal.

Features:

Product Name: Glass Curtain Wall

Function: Soundproof, Adjust The Light

Patterns Selection: Customized Design Available

Protection: Thermal Insulation

Aesthetics: Sleek And Modern

Panel Thickness: 1.4~3.0mm

Technical Parameters:

Aluminium Color	Customizable Color
Panel Thickness	1.4~3.0mm
Aesthetics	Sleek And Modern
Function	Soundproof ,Adjust The Light
Protection	Thermal Insulation
Durability	Long-lasting
Patterns Selection	Customized Design Available
Heat Insulation	Yes
Advantage	Waterproof, Soundproof, Energy Saving

Applications:

The Glass Curtain Wall product by GuangdongSuperHuge, model MQ, is a versatile and modern building material that can be used in a variety of applications and scenarios. With its origins in China, this product is certified with CE and ISO, ensuring high quality and performance standards.

The Glass Curtain Wall is suitable for a wide range of product application occasions, making it a popular choice for commercial, residential, and institutional buildings. Its long-lasting durability makes it ideal for high-rise buildings, shopping malls, office complexes, and hotels.

One of the key advantages of the Glass Curtain Wall is its ability to provide waterproofing, soundproofing, and energy-saving benefits. This makes it a practical choice for buildings located in busy urban areas or areas with extreme weather conditions.

Customers can benefit from the customizable design options available for the Glass Curtain Wall, allowing them to select patterns and choose from a variety of aluminum colors to suit their specific project requirements. The panel thickness ranging from 1.4mm to 3.0mm ensures flexibility in design and application.

When ordering the Glass Curtain Wall, customers should note that the minimum order quantity is 100m², with a price of 580RMB per unit. The product is packaged in wooden boxes for safe transportation and has a delivery time of 20-60 working days. Payment terms are accepted via T/T, providing convenience for customers.
