Customized Design Glass Curtain Wall Customized Patterns and Heat Insulation Advantage

Our Product Introduction

for more products please visit us on glass-curtainwall.com

Basic Information

- Place of Origin: China
- Brand Name: GuangdongSuperHuge
- Certification: CE,ISO
- Model Number: MQ
- Minimum Order Quantity: 100m²
- Price: 580RMB
- Packaging Details: Wooden Box
- Delivery Time: 20-60work days
- Payment Terms: T/T

Product Specification

- Heat Insulation: Yes
- Patterns Selection: Customized Design Available
- Durability: Long-lasting
- Protection: Thermal Insulation
- Aesthetics: Sleek And Modern
- Aluminium Color: Customizable Color
- Panel Thickness: 1.4~3.0mm
- Advantage: Waterproof, Soundproof, Energy Saving
- Highlight: **customized glass curtain wall,**
heat insulation glass wall,
patterned glass curtain wall

Product Description

Product Description:

The Glass Curtain Wall is a modern architectural feature that provides a sleek and stylish facade to buildings. It offers a range of advantages that make it a popular choice for commercial and residential properties.

Advantage:

The Glass Curtain Wall is designed to be waterproof, ensuring that the interior of the building remains protected from water damage. This feature is essential for maintaining the structural integrity of the building and preventing mold and mildew growth.

Additionally, the Glass Curtain Wall is soundproof, helping to create a quiet and peaceful environment inside the building. This is particularly beneficial for buildings located in noisy urban areas or near busy roads.

Furthermore, the Glass Curtain Wall is energy-saving, thanks to its thermal insulation properties. By reducing heat loss in the winter and heat gain in the summer, the Glass Curtain Wall helps to lower energy bills and improve the overall sustainability of the building.

Function:

In addition to its advantages, the Glass Curtain Wall also offers functional benefits. It is designed to be soundproof, helping to create a peaceful and comfortable indoor environment. This is especially important for buildings that house offices, hotels, or other commercial spaces where noise can be a distraction.

Moreover, the Glass Curtain Wall allows for the adjustment of natural light entering the building. By controlling the amount of sunlight that penetrates the interior, building occupants can create a more comfortable and visually appealing environment.

Protection:

One of the key features of the Glass Curtain Wall is its thermal insulation properties. This helps to protect the interior of the building from extreme temperatures, keeping it cool in the summer and warm in the winter. By reducing the need for excessive heating or cooling, the Glass Curtain Wall helps to lower energy costs and reduce carbon emissions.

Patterns Selection:

Customized design options are available for the Glass Curtain Wall, allowing for a wide range of patterns and styles to be incorporated into the facade of the building. This flexibility enables architects and designers to create unique and visually stunning exteriors that complement the overall aesthetic of the property.

Aluminium Color:

The color of the aluminium framing of the Glass Curtain Wall can be customized to suit the design preferences of the building owner. This customization option allows for seamless integration of the Glass Curtain Wall into the overall design scheme of the building, creating a cohesive and harmonious look.

Features:

Product Name: Glass Curtain Wall

Aluminium Color: Customizable Color

Advantage: Waterproof, Soundproof, Energy Saving

Patterns Selection: Customized Design Available

Heat Insulation: Yes

Durability: Long-lasting

Technical Parameters:

Heat Insulation	Yes
