Basic Information

- Place of Origin: China
- Brand Name: GuangdongSuperHuge
- Certification: CE,ISO
- Model Number: MQ
- Minimum Order Quantity: 100m²
- Price: 580RMB
- Packaging Details: Wooden Box
- Delivery Time: 20-60work days
- Payment Terms: T/T

Product Specification

- Advantage: Waterproof, Soundproof, Energy Saving
- Heat Insulation: Yes
- Protection: Thermal Insulation
- Panel Thickness: 1.4~3.0mm
- Patterns Selection: Customized Design Available
- Aesthetics: Sleek And Modern
- Function: Soundproof ,Adjust The Light
- Aluminium Color: Customizable Color
- Highlight: **custom glass curtain wall design, durable glass curtain wall, adjustable light glass curtain**

Product Description:

The Glass Curtain Wall is a modern architectural innovation that provides a sleek and elegant facade for buildings, enhancing their aesthetics and functionality. With its advanced design and construction, the Glass Curtain Wall offers a range of advantages that make it a popular choice for commercial and residential projects.

One of the key advantages of the Glass Curtain Wall is its waterproof feature, ensuring that the building facade remains protected from water infiltration and damage. This helps maintain the structural integrity of the building and prevents issues such as mold and mildew growth.

Additionally, the Glass Curtain Wall is soundproof, serving as a barrier to outside noise and creating a peaceful interior environment. This is especially beneficial for buildings located in busy urban areas or near high-traffic zones, where noise pollution can be a significant concern.

Another notable advantage of the Glass Curtain Wall is its energy-saving properties. By incorporating thermal insulation technology, the Glass Curtain Wall helps regulate indoor temperatures, reducing the need for excessive heating or cooling. This not only improves energy efficiency but also lowers utility costs for building owners.

When it comes to protection, the Glass Curtain Wall excels in thermal insulation, creating a barrier that minimizes heat transfer between the interior and exterior of the building. This helps maintain a comfortable indoor climate regardless of external weather conditions, enhancing the overall occupant experience.

In terms of heat insulation, the Glass Curtain Wall is designed to provide effective insulation against heat loss or gain, contributing to energy efficiency and sustainability. This feature helps reduce the building's carbon footprint and promotes a more environmentally friendly construction approach.

Furthermore, the Glass Curtain Wall is known for its exceptional durability, offering a long-lasting solution for building facades. Constructed with high-quality materials and precision engineering, the Glass Curtain Wall is designed to withstand the test of time, ensuring years of reliable performance and minimal maintenance requirements.

For those seeking customization options, the Glass Curtain Wall provides a range of patterns and designs to choose from, allowing for personalized solutions that meet specific aesthetic preferences and project requirements. Whether it's a unique color scheme, textured finish, or bespoke layout, the Glass Curtain Wall can be tailored to suit individual design visions.

In conclusion, the Glass Curtain Wall is a versatile and efficient solution for modern building facades, offering a blend of style, functionality, and performance. With its waterproof, soundproof, and energy-saving advantages, along with thermal insulation and long-lasting durability, the Glass Curtain Wall stands out as a top choice for architects, developers, and building owners looking to elevate their projects with a touch of sophistication and innovation.

Features:

Product Name: Glass Curtain Wall
Patterns Selection: Customized Design Available
Heat Insulation: Yes
Advantage: Waterproof, Soundproof, Energy Saving
Panel Thickness: 1.4~3.0mm
Protection: Thermal Insulation

Technical Parameters:

Function	Soundproof, Adjust The Light
Aesthetics	Sleek And Modern
Durability	Long-lasting
Aluminium Color	Customizable Color
Panel Thickness	1.4~3.0mm
Advantage	Waterproof, Soundproof, Energy Saving
Heat Insulation	Yes
Protection	Thermal Insulation
Patterns Selection	Customized Design Available

Applications:

When it comes to enhancing the aesthetics and functionality of a building, the GuangdongSuperHuge Glass Curtain Wall (Model: MQ) is the perfect solution. Originating from China, this product is designed to meet high standards of quality and performance with certifications such as CE and ISO.

The Glass Curtain Wall from GuangdongSuperHuge is a versatile product suitable for a variety of application occasions and scenarios. Its minimum order quantity of 100m² makes it ideal for both small and large-scale projects. Priced at 580RMB, this product offers excellent value for its features and benefits.

With packaging details in a sturdy wooden box, the delivery time of 20-60 work days ensures timely arrival at the designated site. Payment terms via T/T make transactions convenient and secure for customers.

One of the key advantages of the GuangdongSuperHuge Glass Curtain Wall is its waterproof, soundproof, and energy-saving properties.

This makes it a desirable choice for buildings looking to improve insulation and reduce noise pollution. The ability to adjust light transmission adds to its functionality.

Customizable aluminum colors and a long-lasting durability ensure that the Glass Curtain Wall not only complements the design of the building but also stands the test of time. Customers can also benefit from a wide range of pattern selections with customized designs available to suit their specific requirements.
