

Waterproof and Customizable Color Aluminum Glass Curtain Wall with 1.4~3.0mm Panel Thickness

Our Product Introduction

Basic Information

- Place of Origin: China
- Brand Name: GuangdongSuperHuge
- Certification: CE,ISO
- Model Number: MQ
- Minimum Order Quantity: 100m²
- Price: 580RMB
- Packaging Details: Wooden Box
- Delivery Time: 20-60work days
- Payment Terms: T/T

Product Specification

- Aluminium Color: Customizable Color
- Heat Insulation: Yes
- Durability: Long-lasting
- Patterns Selection: Customized Design Available
- Protection: Thermal Insulation
- Function: Soundproof ,Adjust The Light
- Advantage: Waterproof, Soundproof, Energy Saving
- Aesthetics: Sleek And Modern
- Highlight: **Waterproof Aluminum Glass Curtain Wall,
Customizable Color Glass Curtain Wall,
1.4~3.0mm Panel Thickness Glass Curtain Wall**

Product Description

Maximize Energy Efficiency with Thermal Insulation and Soundproof Glass Curtain Wall

Product Description

The Glass Curtain Wall is a cutting-edge architectural product that offers exceptional protection and thermal insulation for buildings. This innovative system is designed to enhance energy efficiency, provide heat insulation, and ensure long-lasting durability for a wide range of structures.

One of the key features of the Glass Curtain Wall is its superior thermal insulation properties. By effectively reducing heat transfer between the interior and exterior of a building, this product helps maintain a comfortable indoor environment while minimizing energy consumption. The advanced design of the Glass Curtain Wall ensures that buildings stay warm in cold weather and cool in hot weather, making it an ideal choice for sustainable construction projects.

In addition to its thermal insulation capabilities, the Glass Curtain Wall is also known for its exceptional durability. Constructed with high-quality materials, this product is built to withstand the test of time and maintain its structural integrity even in harsh weather conditions. The panel thickness of the Glass Curtain Wall ranges from 1.4mm to 3.0mm, providing a sturdy and reliable barrier against external elements.

Another advantage of the Glass Curtain Wall is its waterproof properties. By effectively sealing out moisture and preventing water infiltration, this product helps protect buildings from water damage and mold growth. Additionally, the Glass Curtain Wall is soundproof, reducing noise transmission and creating a quieter and more comfortable indoor environment for occupants.

Furthermore, the Glass Curtain Wall is designed to be energy-saving, helping reduce overall energy costs for building owners. By minimizing heat loss and optimizing natural light penetration, this product contributes to a more sustainable and environmentally friendly building design. The innovative features of the Glass Curtain Wall make it a popular choice for architects, developers, and building owners looking to enhance the performance and aesthetics of their projects.

Features

Product Name: Glass Curtain Wall

Panel Thickness: 1.4~3.0mm

Aesthetics: Sleek And Modern

Durability: Long-lasting

Advantage: Waterproof, Soundproof, Energy Saving

Aluminium Color: Customizable Color

Technical Parameters

Parameter	Value
Panel Thickness	1.4~3.0mm
Function	Soundproof, Adjust The Light
Aesthetics	Sleek And Modern
Durability	Long-lasting
Protection	Thermal Insulation
Aluminium Color	Customizable Color
Heat Insulation	Yes
Advantage	Waterproof, Soundproof, Energy Saving
Patterns Selection	Customized Design Available

Applications

The Glass Curtain Wall product by GuangdongSuperHuge, model MQ, is a versatile and modern architectural solution suitable for a variety of applications. With its origin in China and certifications including CE and ISO, this product offers reliability and quality assurance. Designed for durability and long-lasting performance, the Glass Curtain Wall is ideal for use in commercial buildings, office complexes, hotels, shopping malls, and residential properties. Its sleek design and customizable aluminum color options make it a perfect fit for modern urban landscapes.

One of the key attributes of this product is its thermal insulation properties, providing protection against heat loss and improving energy

efficiency in buildings. The Glass Curtain Wall offers excellent heat insulation, making it well-suited for regions with extreme weather conditions.

With a panel thickness ranging from 1.4mm to 3.0mm, this product offers structural strength and stability while maintaining a lightweight design. The minimum order quantity of 100m² makes it suitable for both small-scale projects and large-scale developments.

Packaged in wooden boxes for secure transportation, the Glass Curtain Wall by GuangdongSuperHuge comes with a competitive price of 580RMB per unit. Delivery time ranges from 20 to 60 work days, ensuring timely completion of projects. Payment terms are flexible, with options for T/T transactions.
