Product Description

1.4-3.0mm Panel Thickness Glass Curtain Wall with Soundproofing Advantage and Adjustable Light Function

Product Description

The Glass Curtain Wall is a modern and stylish architectural feature that adds elegance and functionality to any building. With its sleek design and versatility, it's a popular choice for commercial and residential properties.

This system offers customizable design options with a wide range of patterns to create a unique look for your building. Built with durable panels ranging from 1.4mm to 3.0mm thickness, it provides protection against harsh weather while offering excellent soundproofing capabilities.

The curtain wall features adjustable light control to create comfortable interior environments and includes thermal insulation properties that regulate temperature for energy efficiency. Its heat insulation further enhances energy-saving capabilities by reducing heat transfer through the building envelope.

Key Features

Product Name: Glass Curtain Wall

Advantages: Waterproof, Soundproof, Energy Saving

Panel Thickness: 1.4~3.0mm

Aluminium Color: Customizable

Durability: Long-lasting construction

Aesthetics: Sleek modern design
